

Experiential Learning
„Kelionė per
pasaulio šalių dienas“

Liepa Aleknavičiūtė 8b

INTRODUCTION

During the experiential learning „Kelionė per pasaulio šalių dienas“ I got familiar with Children’s financial literacy day, World peace day and International sushi day. I found out how each day is celebrated and how each of them appeared. I also got familiar with lots of new english words, I learned about World War II and I even learned to prepare sushi.

DAY 1

CHILDREN FINANCIAL LITERACY DAY

During this day we listened to a lecture about finances. We did group works and this way we learned lots of new words. It was my first time I heard about such a job as financial adviser. The financial adviser, that visited us, told us about the importance of savings. She also explained us how essential it is to know the financial situation of your family. After this lecture we did some more listening tasks and this way repeated all the new words. It was a great and interesting day.

DAY 2

WORLD PEACE DAY

During this day we went to the museum called “Memel Nord”. There I learned lots of interesting facts about the World War II, about Lithuania during this war and what happened during it. The guide told us the history of Klaipėda, of the museum/bunker and he also explained us what russians and germans did to Klaipėda back then. He showed us lots of interesting things from back then (soldiers helmets, the interior of the bunker, the guns) and he even told us about the Aryan race. During this day I broadened my horizon about the World War II and I learned lots of new facts I’ve never heard before.

DAY 3

INTERNATIONAL SUSHI DAY

During this day we learned how to prepare sushi. The sushi chef, that visited us also told us the history of sushi. He told us that sushi didn't always look like it does now and that it wasn't always prepared with the ingredients we use now. The chef showed us different types of sushi and told us about all of them. He let us prepare sushi by ourselves. This way we gained experience. We also had a chance to try the sushi that we made. I think that this day let me learn lots of new and interesting things.

FINAL CONCLUSION

In summary, I really enjoyed all the activities I participated in. I learned lots of new and interesting things, that I definitely will use in the future. My favourite day was probably World peace day or International sushi day, because during them I had a chance to participate in some fun and interesting activities. During these days I spent my time more active. I could take a part in games and sushi making. So I think all the activities gave me fun and interesting experience that I will never forget.
